

# GOGREEN PLUS CERTIFICATE 2025

By using DHL eCommerce Benelux<sup>3</sup> their transport company, emission-reducing measures in the logistics network of DHL eCommerce have been supported.

For the period from 01-01-2025 to 31-12-2025, the CO<sub>2</sub>e<sup>1</sup> emissions (WtW<sup>2</sup>) listed below were independently verified in an audit ducted by SGS.

Category:	Unit	Low Emission Transport Service	Reference Service Emissions without Reduction Measures <sup>1</sup>
WtW emissions	t CO <sub>2</sub> e	<b>449,33</b>	<b>578,04</b>
Number of Pieces	pcs	<b>961</b>	

**Reduced WtW emissions** t CO<sub>2</sub>e **128,71** **(- 22,3 %)**

Certificate ID:

These reduced emissions relate specifically to the customer for whom this certificate has been issued and take into account all of their shipments processed through DHL eCommerce Benelux<sup>3</sup> logistics network under the GoGreen Plus program(s).

DHL eCommerce Benelux<sup>3</sup> has reduced greenhouse gas emissions for users of GoGreen Plus products and services through the following measures:

- Use electric vehicles
- Use of hydrotreated vegetable oil as fuel within own truck network
- Use of hydrotreated vegetable oil as fuel within the DHL Group & Service Partners
- Use of heat pumps, led light, green electricity, BREEAM (new) company-owned buildings

**Ryan Hunter**

DHL eCom  
Chief Commercial Officer

This certificate is issued by DHL eCommerce Benelux<sup>3</sup>. The emissions have been calculated and reduced via expenditures on sustainable road fuel and electricity powered vehicles as mentioned above. SGS (Société Générale de Surveillance) has verified the tracked greenhouse gas emissions and the related reductions against the Carbon Management System and according to the "Greenhouse Gas Protocol – Product Life Cycle Accounting and Reporting Standard".

Definitions of the terms mentioned in this certificate can be found on the following page.

<sup>1</sup>Reference measures of underlying transport services for shipments in scope of GoGreen Plus, based on a fossil energy source, to facilitate comparisons.

<sup>2</sup>The above Energy Source figures are calculated with verified conversion factors and are provided for reference only.

<sup>3</sup>DHL eCommerce Benelux is used as work entity for the following legal entities: DHL eCommerce (Netherlands) B.V., DHL eCommerce (Services) B.V. DHL eCommerce (Belgium) NV depending on product.

# GLOSSARY

<b>Term</b>	<b>Definition</b>
Bio-CNG	Substitute for Compressed Natural Gas based on biogas
Bio-LNG	Substitute for Liquefied Natural Gas based on biogas
CO <sub>2</sub> e	CO <sub>2</sub> equivalents include carbon dioxide (CO <sub>2</sub> ) and other greenhouse gases such as methane (CH <sub>4</sub> ).
EV	Electric Vehicle
HVO	Hydrotreated Vegetable Oil (also known as renewable Diesel)
HFO	Heavy Fuel Oil (fossil marine fuel)
Jet-A	Conventional, fossil jet-fuel
Low Emission Transport Service	Transport Service based on sustainable fuels and/or clean technologies such as electric vehicles
MJ	Megajoule – relevant measure for energy content of Fuel
SMF	Sustainable Marine Fuel
SAF	Sustainable Aviation Fuel
tkm	Tonne-kilometer – relevant measure for transport service volume
WtW	Well-to-Wake emissions include the full lifecycle from production to use of a fuel / energy carrier used
WtW emission baseline	All GHG emissions are calculated with lifecycle (WTW) emission factors. For the year 2025, the emission factors from the GLEC Framework 3.1 (kerosene, diesel and fuels from natural gas) and from the latest IEA emission factor set (electricity and district heating) have been applied for the reference transport service.
